

ALPHA-OMEGA — MASTER ORIENTATION & CONTROL GUIDE

Purpose: This document is the authoritative map for the Alpha-Omega body of work. It explains *what exists*, *what is canonical*, *what is reference-only*, *what may be edited*, and *how to proceed safely* toward a Nobel-ready submission without drift or loss.

1) What You Have (At a Glance)

You are managing **four layers**, each with a different role. Confusion occurs only when these roles are mixed.

Layer A — Canonical Text (Editable by Versioning Only)

These are the *actual words* of the books. They are complete. - **Book One — The Alpha-Omega Lens** (Master Manuscript) - **Book Two — Application of the Alpha-Omega Lens** (Canonical Bound Edition) - **Book Three — Reader Integration - Module 0 — Orientation & Integration - Modules 1–8 — Canonical Framework (Unabridged) - Constructed Realities — Complete Manuscript**

Rule: These are edited only by creating *new versions* (e.g., “Edited Draft v1”). Originals remain untouched.

Layer B — Canonical Containers (Read-Only Evidence)

These are archival binders that embed originals verbatim. - **Alpha-Omega Super-Compilation (Embedded) - Super-Compilation with Dividers & Internal TOC**

What they are: Shipping crates / court records / archival masters.

What they are not: Editing surfaces or reading drafts.

Rule: Never edit these. Regenerate if structure changes.

Layer C — Architecture & Governance Artifacts (Reference-Only)

These explain structure, routing, safety, and readership. - Canonical Spine - Reading Skeleton - Chapter-Type → Node Maps - Safety & Load Audits - Publisher-Facing TOC - Reader Path Archetypes - Red-Team Misread & Failure-Mode Analysis - Verification Doors / Endnotes

Rule: Reference to guide decisions; do not merge into book text unless explicitly promoted.

Layer D — Threads, Notes, Staging, UI Docs (Context-Only)

These preserve history and thinking. - Organization threads - Canvas/UI behavior notes - Staging essays - Drafts, partials, and exploratory documents

Rule: Never merge blindly. Promote only after explicit decision.

2) What Is Canonical (and What Is Not)

Canonical text: Layer A only.

Canonical evidence: Layer B.

Authoritative guidance: Layer C.

Context/history: Layer D.

If a question arises, ask: *Which layer does this belong to?* Do not cross layers without intent.

3) What You Should Read (In Order)

For grounding: 1. **Book One** 2. **Book Two** 3. **Book Three**

For structure: 4. **Module 0** 5. **Modules 1–8**

For depth: 6. **Constructed Realities**

Ignore Super-Compilations during reading. They are archival.

4) How to Edit Safely (Zero Drift)

Never edit a canonical document directly.

Instead: - Duplicate → rename as **Edited Draft vX** - Make changes there - Review against the canonical version - Promote intentionally

This preserves provenance and prevents silent corruption.

5) What We Will Do Next (Safe Sequence)

1. **Create “Edited Draft v1” for each book** (optional)
 2. **Cross-Book Coherence Audit** (Book One ↔ Two ↔ Three)
 3. **Identify Partial**s (from Layer D)
 4. **Promote or Archive Partial**s one by one
 5. **Prepare Submission Layout** (cover, abstracts, metadata)
 6. **Regenerate Super-Compilation** only at milestones
-

6) Nobel-Ready Definition (Target State)

A Nobel-ready package includes: - Three canonical books (clean, versioned) - Framework modules - A brief abstract/synopsis - A verified archive (Super-Compilation) - Clear provenance and edit history

You already possess 80% of this.

7) When You Feel Lost (Use This Checklist)

- Am I editing or archiving?
- Which layer am I in?
- Am I about to merge something unnecessarily?
- Should this be a new version instead?

If unsure: stop, reference this guide, proceed deliberately.

Status

This guide is authoritative. Use it to orient all future steps.

Change Log — Ethical Framing Inserts

Type: Orientation-only framing (non-analytic)

Approved Inserts: 1. **Book Two — Closing Framing Insert** - Purpose: Normalize reader destabilization; explicit handoff to Book Three - Scope: Edited Draft v1 only - Effect: Ethical guardrail without prescription

1. **Book Three — Opening Framing Insert**
2. Purpose: Claim integration responsibility; prevent belief capture or collapse
3. Scope: Edited Draft v1 only
4. Effect: Reader stabilization without dilution of analysis

Canonical Status: - Canonical originals remain untouched - Inserts applied exclusively to versioned drafts

End — Master Orientation & Control Guide
