

Alpha-Omega — Archival Super-Compilation

Status: LOCKED — FINAL ARCHIVAL SNAPSHOT

Purpose (Archival Only)

This canvas is an **immutable archival container**. It preserves a single, inspectable snapshot of the final submission package exactly as it existed at lock time.

It is **not** a reading draft. It is **not** an editing surface. It is **not** a working manuscript.

Its sole function is evidentiary: to demonstrate what existed, in what form, and under what constraints, at the moment of finalization.
